

# VO BAO LONG

## Front-end Developer

HCM City • 034 807 3013 • works.vobaolong@gmail.com • linkedin.com/in/vobaolong  
github.com/vobaolong

### SUMMARY

Experienced Front-end Developer focused on performance, usability, and clean code. Skilled in React.js, Next.js and modern UI frameworks, with hands-on experience in building responsive and integrating RESTful API. Seeking a challenging role to leverage technical expertise and drive engineering excellence.

### SKILLS

**Programming Languages:** JavaScript, TypeScript

**Frameworks & Libraries:** React.js, Next.js, TailwindCSS, AntDesign, TanStack Query, Bootstrap, MaterialUI, Zustand

**Tools:** Git, Postman, Vite

**Soft skills:** Teamwork, Flexibility, Problem Solving

**Languages:** VietNameese: (Native); English: (Able to read and understand technical documentation)

### WORK EXPERIENCE

#### FREELANCER

##### Frontend Developer

Remote  
Oct 2024 – Present

- Developed responsive websites using Next.js, Tailwind CSS, and React.js, optimized for performance
- Converted Figma designs into responsive UIs, ensuring smooth performance and meeting client requirements

#### QKIT SOFTWARE CO., LTD.

##### Frontend Developer

HCMC, Vietnam  
Feb 2023 – May 2023

- Built UI components for an internal employee tracker system using Vue.js and Vuetify, enhancing usability across HR workflows
- Integrated RESTful API to display real-time employee data and improved data loading speed by ~25%

#### FPT SOFTWARE CO., LTD.

##### Frontend Developer Intern

HCMC, Vietnam  
Jul 2022 – Sep 2022

- Built responsive UI components based on design specs using HTML, CSS, and JavaScript
- Collaborated in a Scrum-based team project simulating real-world workflows and practices

### EDUCATION

#### HCMC University of Technology and Education

Engineer's degree Software Engineering

Cumulative GPA: 3.1/4.0

HCMC, Vietnam  
Sep 2019 – Jul 2024

### PROJECTS

#### SOLAR ENERGY MANAGEMENT SYSTEM (2 Members)

Mar 2025 – Apr 2025

A real-time monitoring and analytics platform for solar energy systems, enabling users to track energy production, detect system issues, and optimize performance through data-driven insights.

- Built real-time monitoring dashboard with Ant Design for solar panel performance tracking
- Used Zustand for complex energy data state and React Query for real-time sensor data updates
- Technologies: React.js, TypeScript, Ant Design, Zustand, React Query

### HIONE (4 Members)

Sep 2024 – Dec 2024

Healthcare management system for welfare centers, focusing on elderly and disabled care coordination.

- Built patient care dashboard with Ant Design for medical record management
- Used Zustand for care schedule state and React Query for patient data synchronization
- Technologies: React.js, TypeScript, Ant Design, Zustand, React Query

### EMPLOYEE TRACKER (7 Members)

Jan 2023 – May 2023

Internal web app for managing employee attendance, leave requests and meeting schedules.

- Built UI with Vuetify for employee data management
- Used Vuex for state and Axios for API integration
- Technologies: Vue.js, TypeScript, Vuetify, Vuex, Axios
